

**JOE BROWN**  
**CONTRACTORS LTD**

These are some results of turning your wheels when your vehicle is stationary.

**Fact Sheet**

**Your newly laid Tarmacadam**

Your newly laid Tarmacadam will be soft, especially in hot weather.

**Extra care needs to be taken to keep your drive looking as new.**

**Things you can do to help prevent damage to your new Tarmacadam:**

- Spray plenty of water on the new Tarmacadam will help to keep it cool.
- When driving on your new Tarmacadam, make sure your wheels are moving before you turn your steering wheel.
- Don't stand things on the Tarmacadam as they will sink into the Tarmacadam. Eg pots, ladders, clothes line props, chairs, tables.
